**ABSTRACT:**

*The need for learning has been increased with the rapid growth of modern technology and knowledge. E-learning has dramatically changed the manner and process of delivering learning courses and imparting necessary knowledge.*

*The speed, time and distance related issues have been greatly resolved through it. The main aim is to understand parent's perception of supporting and encouraging the online classes. The students are not limited or restricted in any manner, regarding course materials, availability of faculty members, accessibility, and time related issues. From this we can know what parents think about their child's connection with teachers in online mode.*

*Keywords: online teaching, online learning, parent's perspective, screen timing, covid-19, network issue*

**INTRODUCTION:**

Whenever we hear the word 'LEARNING' the picture of physical classroom come to our mind but is it necessary one should go to college and gain knowledge we can gain knowledge at any time anywhere and now-a-days this is proved by our colleges A decade ago, it was common to hear that "online learning is the future" indeed it became the future and is now very much the present, but our idea of what online learning should be has changed dramatically over those ten years. Educators are now at a point where they have revised what effective online learning means, discarding the early passive, consumption-oriented model for one that is far more engaging and interactive.

With educational institutes closed due to the COVID-19 pandemic, the government has been encouraging online education to achieve academic continuity. Most high-end private and public institutions have made the switch smoothly using online platforms such as zoom, google classrooms, microsoft teams, etc., While many still find it a herculean task. The challenges of online education are multifaceted. It is time that we Indians, as a society, understand the realms of online education- in India, for India.

The mode of education has changed face to face teaching to online learning now student do not have to go to colleges they have to learn from home with own speed so they are getting education from home parents are more involved in teaching learning process. Research studies indicate that parent influences and involvement effect of child learning so when they are taking their class at home it is necessary to know the parent's point of view can increase the effectiveness of online class because parent study indicate the parent prospection on online classes of their child at home by their teachers

Many parent's might not be able to bare the expense as online teaching has brought the necessity of purchasing device, getting online connections so that parents of such income group may not be able to provide the education to their children.

**REVIEW OF LITERATURE**

According to Manash Pratim Gohain, June 24,2020 in the article has mentioned that due to pandemic there are disrupted normal college routine. The parents divided their work and they want students should study regularly for 4 to 5 hours. In rural areas there are underdeveloped villages face internet connection issue as well as there are many parents in villages, they are facing problems in buying tablets phones laptop due to finance issue.

Hindustan Time article, Rajanbir Singh, July 20,2020 More time spent on screen may leave worrying feels that it turns into "worse than cannabis addiction". It affects physical problem like eyestrain, ear obesity, disturb sleep pattern of child. According to optician report the children have complained of eyestrain. The ministry of human resource development recommended some screen time for children 1 to 8 - and for 9 to12 and other 4 classes for 45 minutes. Some of the colleges and schools not follow the instruction properly.

New education policy, Yash Dhamija August 10,2020 the new education policy should be a success reducing the stress of education on the student while also accessing the new avenues of education like critical thinking and analysis how ever seen only when it has implemented.
